REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 1-5 are allowable over the prior, because the prior art is silent to a apparatus forming a bipolar plate assembly comprising: an anode plate with a first bore there through; a cathode plate with a first cathode bore there through, and a pin disposed in the first anode and cathode bores. Claims 6-9 are allowable because the prior art is silent to a method of providing the bipolar plate of claim 1.

The prior art, such as Blunk et al., U.S. Pub. 2003/0096151, teaches a bipolar plate comprising an anode and cathode plates with a plurality of bores or fluid passages (69). See Figure 1. However, the reference is silent to disposing a pin through the bores of the anode and cathode plates to form an aligned bipolar plate. There is no motivation to place the pin of the subject invention in the bores of Blunk, because the referenced bores transport fluid throughout the bipolar plate. Placing pins in the pores would prohibit fluid movement, thereby destroying the cooling capabilities of the bipolar plate. Therefore, the subject invention is patentably distinct from Blunk.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
